Comparison Statistics (continued)

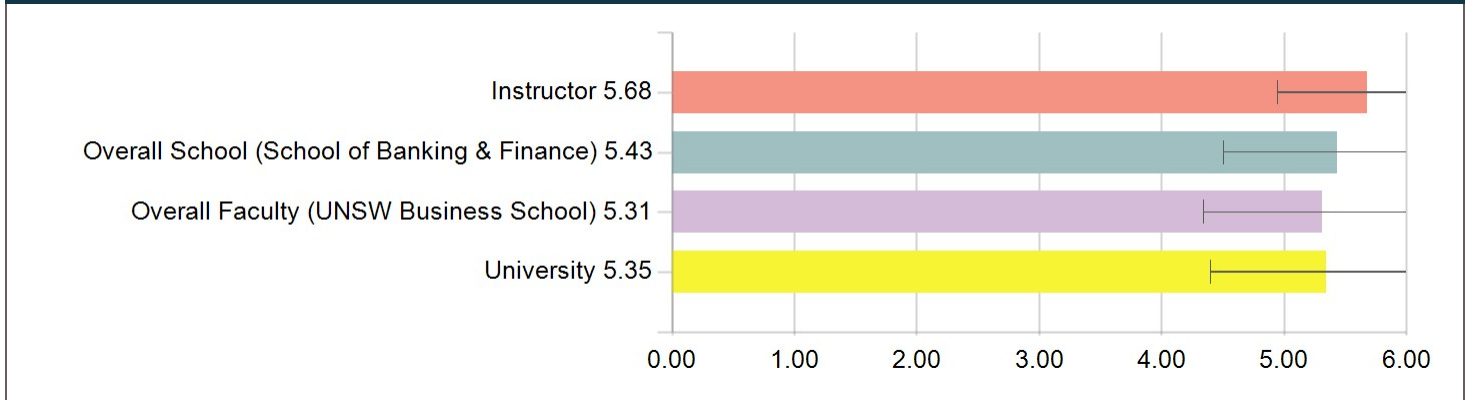

Mean (average student responses between 1 and 6) and StandardDev (Standard deviation of student responses) are used for comparison statistics between Teacher, School, Faculty and University.

2. provided helpful feedback

Comparison Statistics (continued)

Mean (average student responses between 1 and 6) and StandardDev (Standard deviation of student responses) are used for comparison statistics between Teacher, School, Faculty and University.

Raw comment data

The best features of Leo Liu's teaching were

Comments
The professor is very friendly and willing to interact with us in class.
Nice and patient
Interesting and helpful
very clear and practical
Always helpful and eager to spend time individually to assist with issues that arose.
Strong ability and affinity
he explains all the questions that we ask and give us the answer, if not point out to the direction where we can get answer.
He can provide popular examples to help us feel more relaxed when faced with some incomprehensible knowledge.
Prompt replies and extensive explaining of content.
Best lecturer I've ever encountered during my study in UNSW. Lectures are very interesting and delivered in a clear and easy to understand way, and the lecturer makes the topic interesting to study. He is also very understanding to his students and always response to students' questions. His teaching strategies are also highly effective, with the weekly homework and quizzes that are highly relevant to the course materials and deepens our understanding of the topics. Will enroll in his other courses if I can.
Very attentive and encouraging students.
Leo is the best lecturer that I have ever seen so far at UNSW. He is able to explain complicated and difficult materials into a very simple and easy-understanding way. I have attended his MFIN6201 in term 1 and because of this my friends and I chose the modules that he teaches this term. Keep going Leo, we believe you will be one of the most successful professor in UNSW. :)
Provide teaching about Python which is quite helpful.
The course structure is very clear.
Nice teaching style!
Python class, participation is optional but students did engage.

Leo Liu's teaching could be improved by

Comments
None
enjoyed the class. thank you
N/A
Maybe this course can provide some Python exercises (not scored) to help us better master this computer language.
Including more past exam questions in his lectures.
This lecturer should teach in more courses as he is one of UNSW's best lecturer that I have met.
No
The Excel skills might be improved.
